Mines and Prospects-Furnaces and Mills

Enormous Ore Body in the Utah Con.

Tremendous Addition to the Company's Copper-Bearing Resources at Great Depth.

That the stupendous channels may be permitted to drain and the crows subjected to less moisture, work in the face of the crosscut which has advanced in copper, gold and silver-bearing ore for no less than 110 feet on the 200-foot level at the properties of the Utah Con. at Bingham has been momentarily suspended by Manager Channing, and from a station at seventy-five feet in the mammoth ledge a drift is being extended in each direction with its strike. Although the crosscut has penetrated the channel for 110 feet. chero is nothing yet to denote the presence of another wall, while the ore itself is maintaining an average which compares favorably with any of which the properties are productive. It would be unreasonable, indeed, to expect the other wall for some time, as on the level above the walls were 200 feet apart, with the product for the entire distance finding its way to the furnaces of the company. That these demonstrations are being made while the bears of the East are attempting to discredit the resources of the company, renders them, perhaps, all the more gratifying to local interests conversant with the condition, and not a few of whom have embraced the opportunity to ndd to their holdings. The development on the 500-foot level of the properties is perhaps, the most important that has been made in the camp the present scason, and while the timid have been running at the growls of the untutored bear, Manager Channing has been the recipient of a steady shower of congratulation by the neighbors as well as the shareholders in this locality. Meanwhile the output of copper down at the furnaces affords a most impressive story of earnings that are being derived from the ores and the annual report which is to be submitted to the stockholders next month promises not a few surprises.

ACTIVITY DOWN SOUTH. there is nothing yet to denote the presence of another wall, while the ore itself

ACTIVITY DOWN SOUTH.

Much Work Now in Progress Out of Richfield.

Special to The Tribune.

RICHFIELD, March 18.-Preparations are now under way for the resumption of work on a number of properties in the

RICHFIELD, March 18.—Preparations are now under way for the resumption of work on a number of properties in the Gold mountain country as soon as the snow goes sufficiently to afford access, and the indications now point to extensive development within the next two months.

At a special meeting of the directors of the Copper Butte Mining company held in this city Monday, an assessment of one-eight of a cent was levied upon the capital stock of the company for the purpose of continuing work, and a contract was closed with W. J. Shelton for an additional 160 feet of opening in the Shelton No. 2 tunnel. This tunnel is already in a little over 100 feet, and has followed a five-foot vein from the grass roots which carries goed values of copper, gold and silver, copper predominating. A fity-foot shaft has also followed the vein from a higher source. It is expected to strike a cross vein within the next 100 feet to be run, at a depth of about 140 feet from its exposure in the shaft.

The Perjue-Surprise company has also decided upon a plan of action and will shortly resume work on its properties. At the time work was suspended last fall the property was just beginning to get opened up in good shape, with most encouraging results. Veins had been exposed in several places, and it only lacks a little more development to establish a reliable character of the ore being in this ground, and good ore, too, but its extent has not yet been determined. The company has means on hand and in sight to justify it in inaugurating a full season's work, and no doubt this will be the most important year in the history of the Perjue-Surprise. It is stated by reliable parties that Dr. P. A. H. Franklin will arrive from his Eastern trip in the course of a few weeks prepared to take up the extensive development work suspended last fall on the properties which he represents for a party of capitalists. It is said he will be in a position to complete his mammoth undertaking. Six months of such vigorous work as was carried on last season will bri

portant vein.

On the other side of the rim the Signal Peak people are pushing a tunnel in from the west side. They do not anticipate striking anything of note, however, under 250 feet more of tunneling, but there is an abundance of confidence in the ultimate result, and the company has no distress at all for means to prosecute its work.

work

It is expected that something will be done with the Advocate property this season. This property has beer idle for nearly two years, the death of its principal stockholder, A. J. Moore, making it impracticable to operate it.

There are a dozen or more of the best class of properties and claims on the mountain which will be the scene of operations of more or less extensive character during this season, and mining men in general are beginning to entertain a very optimistic view.

BIG ZINC SHIPMENT.

Eight Carloads of First-Class Headed for Ioia, Kansas.

The management of the Horn Silver of Frisco appeared at the Pioneer sampler during the day with a consignment consisting of eight carloads of zinc ore, that will be forwarded at once to the zinc reduction works at Iola, Kan. Under Its contract with the Kansas plant the company, which has found a most desirable market for its high-grade zinc ore there, will be permitted to send out at least another thousand tons, the proceeds adding not a little to the earnings of the company. Meanwhile the management of the concentrator at the mine is piling up a good product derived from the tailings, and it looks at this time as if a steady market would be provided for both classes. The average of the crude ore compares favorably with the best of which the country is capable, the contents averaging about 50 per cent zinc, with some silver and lead. during the day with a consignment con-

Mr. Hardy Sells Ore.

Leonard G. Hardy of this city, who is operating properties at Battle Mountain. New, drew down the proceeds of another consignment of rich ore which was marketed through the Pioneer sampler during the day, and departed for his diggings again, to follow it with another in a short time. While but little has been said of his endeavors in the west, Mr. Hardy has accomplished good results and promises to come forth with a fortune.

MARKET MORE SPIRITED. Indians Pocket Large Profits During Week on 'Change.

The week on the mining exchange closed

on the sale of 152,435 shares of stock, for which \$47,415.55 was paid and with not a ew of the more active traders suffering at the hands of adherents who were drawng down their profits. Notwithstanding this, the average escaped without serious gress foretell a better market as the season shall advance. Of the class that af fords scalps during the week the Shield of Bingham was the most prominent, the shares that had been begging around 17 cents on March 11, selling up to 36 at the

shares that had been begging around 17 cents on March II, selling up to 36 at the opening on Monday and climbing to 52 the following day. The relax came, however, and it closed the week on a transfer at 28, although reports from the property continued favorable to conditions understround. While the advance in Uncle Sam was not so prohounced, the Indian who filling his sack the previous week was per a share her of the more active, dealt out a big interest on the lovestment for the week. The following developed by Butler-Liberal was less fortunate, its shares tumbling from 18 to 14 without apparent cause for it, while Tetro retained its position around 19½, with Carisa closing on a trade at 11½ and Lower Marmoth at 15. Mammoth did some business during the week on an improved market, as did Grand Central, while Victoria, in the same neek of the woods brought \$1.90, with Yankee Con. advancing to 20 cents. New york, whose following is relying on a lower level for improved conditions, was weak and closed on a transfer at 50 cents, while Daily of the same locality found a customer at \$1.80, with Daily west changing hands around \$16.12½. Horn Silver of the southern country was again neglected, although the zinc plant, with which it has been equipped at a cost of \$30.600, is in commission, while Bule Biel, which is taking out some very high grade ore closed an offering at 92 cents, with Columbus Con. changing hands at \$12.52. Star Cos, which Continues to come to market, with Little Chief moving up its pegs a notch of the continues to come to market, with Little Chief moving up its pegs a notch of two. The day closed on the sale of £15.00 shares of stock for \$566.55, and on the following market:

A Reported Strike in the Joe Bowers

Back in the Pioneer Channel a Fine Quality of Ore Makes Its Appearance.

oe Bowers Mining company, Tintic, report a disclosure on the 400-foot level that is reminiscent of a period when it was, perhaps, the most sensational of a cluster

search of rare minerals, will be good news to this part of Utah. Prof A. B. Frenzel of Denver has had an eye on the La Sal coun-try for some time, 2s a source of production of the rare metals, and the fact that this district is noted for the barium and thorium ores has given this industry special notice, whereby the La Sal region in the end will profit.

A number of owners of these rare meials mines are in correspondence with Commission-er White of Colerada, and no ducht much interest will be manifested in this new industry the coming season. With a pretix there of southwestern Colerado in general, and of southwestern Colerado in the first of the territory so far known to be productive of uranium, variadium and the thorium cres in the hydro-curton formation, is in the La Sal range. Some uranium ores have been found on Rock cresk and the Dolores, on the east side of the range, just over the triah line in Colerado, but in no instance has it been found in high chough percentage of uranium to make it pay. None of these properties are developed to any extent, consequently no one knows their real value or continuity of productive values.

There is but one property in shape to guarantee a good preduction of the barum and A number of owners of these rare metals of these proporties are developed to any extent, consequently no one knows their real
value or continuity of productive values.
There is but one property in shape to guarantee a good preduction of the barium and
thorium ores and that is the Weight-Lofftue
property near Richardson. With its limited
imount of development, there is sufficient
one in sight to warrant a good production and
at the maximum grade of values, to make
t pay. The best at Hichardson can be traced
for ten miles, but the values and percentage
cary considerably from the requirements of
any ore. All who are familiar with uranium
ninerals know that nothing below II per
sent of transities will pay. The Weight-Lofftue
nine has regular values of from 25 to 31 per
sent, and from 13 to 17 per centiv vanadium,
it also carries good values in gold, silver

valley is another perperty that if developed

ORES AND BULLION.

Settlements for the Week Amount to Nearly Half-Million.

The week in the ore and bullion marke closed on settlements amounting to \$472,-200, this compared with \$500,200 for the previous one, and while the record has yet to be restored the producers are undoubtedly reporting with a larger volume of natural wealth than at any period in the natural wealth than at any period in the history of the industry in this State. The day's settlements amounted to \$71.200, McCornick & Co. reporting them as they follow: Builton, \$25.600; gold, silver, lead and copper orea, \$41.700.

In the metal market silver ruled at \$7% cents an ounce, lead at \$1.50 and \$4.45 per hundred pounds, and casting copper at \$14% cents a pound.

The volume of copper containing gold and silver "forwarded" from the various furnaces during the week was about the same as has it been for many months, although the "production" at each of the plants shows a steady increase.

MR. JENSEN RESIGNS.

Will Leave for Goldfield to Join in Operations There.

That he may devote his attention to undertakings that promise more liberal remuneration, J. B. Jensen has tendered hts resignation as manager of the Pioneer sampler and in a few days departs for Goldfield, Nev., where he has acquired interests. Having completed the work requiring his talents in that camp of gold, Mr. Jensen has the compilation of plans for a concentrator that is to be erected in one of the camps of southern Nevada, and while it would be indiscrest to release the particulars at this time, the enterprise has the support of prominent and wealthy Utah and Eastern talent. For two years Mr. Jensen has served the company operating the Pioncer sampler and during that period has carned the friendship and esteem of a large number of clients whose good wishes will accompany him in whatever field he may find moorings. sampler and in a few days departs for

Boston Coppers Quiet. Special to This Tribune.

BOSTON, Maiss, March 18.—Cupper shares were very quiet today, only a few making their appearance after the opening. There was a little liquidation to be seen at the opening, and also some short selling; but after the pressure was removed the tendency was to improve, although trading was very light. Active issues displayed a firm undersone, and indications point to a renewal of the buil market, should the New York market improve. Hornblover & Weeks, brokers, at State street, Boston, and 10 Wall street, New York, furnish the following quotations:

The Dixie Ledge

Ores of Fine Quality Revealed in Several Shafts Along the Copper-Bearing Zone.

The Dixle ledge out of St. George, in the outhern country, and for many years productive of some of the richest and of hourly increasing activity, says HonRobert C. Lund, and to the original undertaking which is at present enriching the
Utah & Eastern company will, in his opinion, be added at least three more before
the campaign has progressed much further. The Dixie mine itself, said he, has
never appealed so powerfully to the company as it does at present, and to open up
the changel at greater depth, the sinking
of the main shaft will be resumed at
once. Meanwhile it continues to put out
a class of ore that rules bigher in the red
metal than does any mine in the State of
Utah, while in no period in its career has
there been as much of this class of rock
exposed. of hourly increasing activity, says Hon

there been as much of this class of rock exposed.

On the east of the Dixie, as it will be ever characterized by the pioneers of that region, the management of the Foymaster, ever which there has been so much rivalry, has encountered the ore bedies and is calling for a gasoline hoist with which to follow it to greater depth, while on the west the owners of the Surprise group have a similar hoist in commission and a fine quality of ore exposed in the property. Further west the owners of the old Black Warrior group have uncovered a fine quality of lead ore at a depth corresponding with that at which a similar class of ore occurred in the Dixie mine in the early day, and with these demonstrators of longevity along the ledge a number of others are preparing to prispect the ber of others are preparing to prespect the region which has been no doubt neglected. Mr. Lund, who was one of the first to operate the Dixie, recognized the possibilities of a most populous camp in that lecality now that better facilities for the marketing of the ores have been provided.

UNCLE SAM'S STRIKE.

Sensational Values in Silver Appearing With the Galena.

The week's report from the properties of the Uncle Sam certifies to most substantial improvements down there, while the record at the receiving stations tells of a all of hisrhisrockers, treet.
has been drifting on the new channel with a full breast of ore in the face of it at the close and while some cross-cutting was cone, but one wall was exposed in it. Of the quality of the ore along the drift, which has been punched into the ledge for nearly sixty feet, it is said that it compares with the best of which the region is productive, and that it will show at this time an average of 50 per sent lead, with some of the samples testifying to the presence of over 400 cunces sliver per ton. The management has attempted no steping in this channel yet, but is forwarding from it such ore only as is broken down in development. A number of local intercets will visit the properties today. record at the receiving stations tells of a

COMING MORE FREELY.

Output of Ore From Red Elephant Mines and Mill.

From the Red Elephant group of mines perated by the Little Quincy Mining company of this city, the management came own from Halley, Ida., during the week down from Halley, Ida., during the week with one more lot of crude ore, another of concentrates. The former was marketed on controls showing as much as 12 ounces sliver with 65 per cent lead per ton, while assays on the latter certified to the presence of 50 ounces sliver and 44 per cent lead. With the behavior of the undertaking the company has every reason to be much pleased, as it is at present providing the means with which to drive the long tunnel to a connection with the orebearing channels at great depth and connection with them to take place the present season. The outlook is as assuring as is the present condition on the old levels, and were it the policy of the management the output might be doubled.

Goldfield The Wonder of the World Over \$4,000,000

Worth of Ore Shipped in One Short Year . . .

"Goldfield Is Simply Great"

That is the way Mr. Laurence Tenny Gray, well-known in the mining world of the West, epitomizes his estimate of the mining camp that in the first year has shipped gold ore worth Four Millions of Dollars, breaking all year has shipped gold ore worth Four Millions of Dollars, breaking all years accords and rivaling the highest score made by the king. dike during its paimiest days.

240 Per Cent Dividends

The Combination Mine of Goldfield, which up to March 1st had been paring dividends at the rate of 19 per cent per month on its capitalization of 400, 000, announces an increase of dividends to 20 per cent per month or 20 per cent per annum; and mining engineers who recently inspected the proper. ty assert that there is at least One Million Dollars' worth of ore in sight A Region of Vast Wealth

As development work progresses it is apparent that Goldfield is destined to become the center of a large area of gold producing territory. The lates news from Bullfrog, is miles south of Goldfield, is the uncovering of a late foot ledge that assays over one Thousand Dollars a ton. Still another carload is reported on Ladd Mountain, near Bullfrog, where the pay streak shows a value of

Five Thousand Dollars to the Ton

The Southwestern Securities Company of Los Angeles—a corporation that makes a business of buying and selling mines—recently financed a new Company called the Goldfield-Herald, in which the first allotment or blook of stock was over-subscribed in less than one week; and later ond allotment of shares at three times the first price-all inside

This Company Now Offers Goldfield-Gladlator Shares at 5c; Par Value \$1.00

The Goldfield-Gladiator Company, incorporated for \$1,500,000, controls three The Goldheid-Gladiator Company, incorporated for standard, controls three claims—the Washoe, Stranger and Tucson—which are located three miles Northeast of the city of Goldfield, adjoining the Hercules Group of claims, in which Mr. Charles M. Schwab is heavily interested.

The Southwestern Securities Company's resident Mining Unglass, Mr. W. B. Rioberts, is now on the ground ready to begin development work-and a rich strike may be expected in the very near future, which will in-sure a rapid rise in the price of shares.

Why Opportunity Is Offered

It is the custom throughout the entire mining section of the Far West to It is the custom throughout the entire mining section of the Far West to realize funds for development purposes by the sale of stock. A large partion of the stock of every company usually goes to those who put up the money for the purchase of the Company's property, and as most of this money is raised by mining men who know the district and are interested

money is raised by mining men who know the district and are interested in dozens of other enterprises, they are glad, at the start, to avail them selves of this means of engaging outside capital.

History shows that the small investor is the man who, more than any other, contributes to the upbuilding of great Mining Camps—because when a man outside the mining region proper puts his money into one of the mining properties, his interest is focused on the mining situation of the Star, and the task of securing big capital at short rolice for other enormous mining enterprises which come up, and are bound to continue to develop in a region where nature has distributed her wealth with such prodigally, is a simpler matter.

You Are Invited to share in Goldfield's Undug Millions

The Goldfield-Gladiator Mining Company has authorized us to dispose of

The Goldfield-Gladiator Mining Company has authorized us to dispose of a limited number of shares of its Treasury stock—fully haid and non-assessable—at the nominal price of 5 cents a share, for the purpose of pushias development work; but in order to benefit by this offer, prompt action as your part is necessary—as no order for stock will be filled which does not reach this office on or before the 30th day of March, 1905.

We further deserve the right to decline all orders—returning funds—ofter the allotment of stock allowed us by the aforesaid Goldfield-Gladiator Mining Company has been subscribed, and be it further understood—we cannot sell fewer than 200 nor more than 10,000 shares to any one personit being the Company's desire to effect a broad distribution of its stock thus enlisting co-operation that will be helpful in promoting other propositions.

\$10 Will Buy 200 Shares, Par Value \$ 200 \$20 Will Buy 400 Shares, Par Value \$ 400 \$40 Will Buy 800 Shares, Par Value \$ 800 \$80 Will Buy 1600 Shares, Par Value \$1,600 \$100 Will Buy 2000 Shares, Par Value \$2000
